

RAYI FORTUNE

Full-Stack Developer & Machine Learning Engineer

rayifortune@gmail.com | +234 913 993 2456 | github.com/Azikisoko | rayifortune.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Developer and Machine Learning Engineer who builds fast, scalable web applications and intelligent AI solutions. Experienced in transforming complex ideas into intuitive digital experiences that solve real-world problems, with a growing specialization in deep learning and computer vision.

FEATURED PROJECTS

Brain Tumor Classification System

- Built a multiclass MRI image classifier distinguishing Glioma, Meningioma, Pituitary tumors, and healthy scans
- Applied transfer learning with EfficientNetB0 (pretrained on ImageNet), fine-tuned in two phases (frozen base, then partial unfreezing)
- Trained on TensorFlow using multi-GPU distributed training (MirroredStrategy) with mixed precision
- Achieved ~94.9% validation accuracy after fine-tuning
- Built a FastAPI backend for inference and a Next.js frontend; deployed to Railway and Vercel
- Applied class weighting and data augmentation to address dataset imbalance and improve generalization

Skin Disease Detection System

- Developed a deep learning classifier for skin disease detection using MobileNetV2, achieving ~89% accuracy
- Handled end-to-end pipeline: data preparation, model training, backend integration, and deployment

E-Commerce Platform

- Built a full-stack e-commerce application with React, Express.js, and Tailwind CSS
- Implemented shopping cart functionality, package tracking, and a sales analytics dashboard

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3, GSAP, Responsive Design

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT/OAuth Authentication

Databases: PostgreSQL, MongoDB, Prisma, SQLAlchemy

Machine Learning: TensorFlow, Keras, PyTorch, Scikit-learn, NumPy, Pandas, OpenCV

ML Concepts: CNNs, Transfer Learning, Computer Vision, Classification, Deep Learning, Model Deployment

DevOps/Tools: Docker, Git, GitHub Actions (CI/CD), Vercel, Railway, Postman, Jupyter/Colab

EXPERIENCE / TIMELINE

AI Engineering Specialization

2026 – Present

- Deepening specialization in AI engineering while strengthening full-stack skills, with a focus on building intelligent systems for business, education, and healthcare

AI/ML & Full-Stack Development Training

2024 – 2026

- Completed AI/ML Engineering Bootcamp (TechCrush) and multiple certifications
- Built out core tech stack across multiple full-stack and ML projects

First Production Deployment

2024

- Built and deployed a full-stack application (Next.js frontend, FastAPI backend) to Vercel and Railway

Foundational Training

2023 – 2024

- Completed Harvard's CS50 and foundational web development training: Git/GitHub, HTML, CSS, Tailwind CSS, JavaScript, React, Next.js

Started Software Engineering Journey

2023

- Began formal study of software engineering with the long-term goal of becoming an AI engineer; started programming from fundamentals

EDUCATION

Obafemi Awolowo University — B.Sc. Microbiology (in progress)

Expected 2028

Certifications: AI/ML Engineering Bootcamp — TechCrush
